

# FRANGIBLE GRP FENCING

## DESCRIPTION

Pollite frangible fencing is a non conductive light weight fencing system manufactured from FRP and GRP composites ensuring a durable robust system capable of resisting extreme weather and pollutant environments. Designed for ease of installation and fully non corrosive this fencing system is ideal for surrounding sensitive monitoring equipment on or around the airfield.

## APPLICATION

The Pollite frangible fence is intended for use in or around the airfield where protective fencing is required to be frangible in accordance with ICAO Annex 14 Pt 6 Frangibility.

## FEATURES

- » Non Corrosive.
- » Non Conductive.
- » Environmentally Durable.
- » Frangible – ICAO compliant.
- » Rapid Installation.
- » Available in a series of colours and sizes.
- » 10 Year Guarantee
- » Lightweight
