

Press release

HiSERV Extends Operations in Spain Through Integration with TOP GSE

Integration of Spanish TOP GSE will expand HiSERV Group's fleet and service network in Southern Europe

Berlin, 09. September 2026

HiSERV, a leading pan-European ground support equipment (GSE) provider, today announced the integration of TOP GSE into the HiSERV Group, extending its presence and service capability across Spain and Portugal.

The integration brings together HiSERV's pan-European fleet and operational model with TOP GSE's local market knowledge and customer relationships in Southern Europe. HiSERV has operated in Spain since May 2026, supporting a major European carrier at Palma de Mallorca; the TOP GSE integration extends that presence with a dedicated local fleet and team.

TOP GSE has supplied ground handling equipment to airlines and ground handlers across Spain and Portugal since 2010. Under the integration, its operations will become part of HiSERV's pan-European network, extending service to leading airlines and ground handlers across 40 airports in Spain and Portugal.

The integration will give customers in Southern Europe access to a wider equipment pool and HiSERV's existing maintenance and pooling infrastructure, while retaining TOP GSE's existing local teams and customer relationships.

"We welcome TOP GSE into the HiSERV Group. What convinced us to build this partnership was the excellence with which TOP GSE treats its customers — it is not something confined to a customer service team, it is genuinely how the whole business operates, from the first call to the equipment on the tarmac. That is exactly the standard we hold ourselves to, and it is the foundation this partnership is built on. It is rare enough that when we find it, we invest in it. Now, with that same standard and a bigger network behind it, we are ready to scale together and build a far larger footprint in Spain — without ever losing what made TOP GSE trusted in the first place. My thanks to everyone on both sides who got us here." — **Roland Ückert, CEO, HiSERV**

"From my first conversation with Roland, I could tell this was not going to be a numbers-first conversation — and that told me everything. HiSERV asked about our customers before they asked about our fleet, and that is exactly how we have always run TOP GSE ourselves: the customer comes first, in every decision, not just the ones that are easy. Finding that same standard at HiSERV is what made this an easy yes for me. Now we get to do what we couldn't do alone — take that same care and put it behind a much bigger footprint across Spain and Portugal. I want to thank my team for building something

worth scaling, and I'm genuinely excited for what's next." — **Mateo Salamanca Sánchez, CEO, TOP GSE**

The agreement was signed on 09 September 2026. HiSERV and TOP GSE will both be represented at GSE Expo Europe, taking place in Lisbon from 15–17 September 2026.

About HiSERV

HiSERV has been revolutionizing the Ground Support Equipment (GSE) rental market since 2017, by delivering premium quality, great flexibility, and fair and transparent prices. As one of the leading GSE service providers in Europe, HiSERV manages a young and modern fleet of around 20,000 GSE units and offers pricing and services that enable the customers to be competitive in ground handling. The various rental options and workshop services give the customers ultimate flexibility. With state-of-the-art technologies HiSERV supports the clients in optimization of their GSE fleets.

About TOP GSE

TOP GSE has supplied ground handling equipment to airlines and ground handlers across Spain and Portugal since 2010. Operating across a network of 40 airports, the company has built long-standing customer relationships through a combined lease and distribution model, giving operators flexible access to the equipment they need, where and when they need it. As of September 2026, TOP GSE is part of the HiSERV Group.
